

Event Vodcast Recording

Studio-quality content from your own keynote speakers and/or clients

Your partners, keynote speakers and clients are already at your event. That's the perfect opportunity to record a 15 to 25 minute vodcast with them, without a detour to the studio.

We do this with our plug & play multi-camera system: five AI-controlled PTZ cameras linked to one switcher. No camera crew needed, and the set is ready within 60 minutes. With 3 presets per camera, we choose from 15 different camera angles that guarantee dynamic footage.

What it delivers

- ▶ *With good preparation (around 6 questions per guest), an average of 8 vodcasts on a single event day.*
- ▶ *8 long-form video episodes for your own website or company video channel, with audio ready to publish directly on Spotify, Apple Podcasts, and similar platforms.*
- ▶ *Using AI, we produce another 3 vertical short-form video snippets per episode, ready to use on social media and a great driver for your long-form video content.*
- ▶ *Maximum visibility, plus a solid contribution to your organization's thought leadership and authority.*

Practical

- ▶ *Ideal at the table: 2 to 3 guests plus a moderator or host.*
- ▶ *This can be done in a separate room, but a quiet corner of the event venue works just as well. That's why we consider an advance location check important.*

Investment

€ 3.725*

- * *Includes the necessary equipment, PPM (Pre-Production Meeting), post-production, addition of branded elements, one revision round, and an online viewer. Excluding travel hours, travel and transportation costs, and VAT.*

Capture Only

€ 2.475*

Do you have your own marketer or freelance editor who prefers to edit it themselves? Then we'll take care of the setup and switching (live or ISO), and deliver both the switched version and all separate ISO camera feeds.

- * *Includes the necessary equipment. Excluding post-production (editing, branded elements, subtitling, etc.), travel hours, travel and transportation costs, and VAT.*
