

Event Vodcast Recording

Studio-quality content from your own keynote speakers and/or clients

Your keynote speakers and clients are already at your event. That's the perfect opportunity to record a 15 to 25 minute vodcast with them, without a detour to the studio.

We do this with our plug & play multi-camera system: five AI-controlled PTZ cameras linked to one switcher. No camera crew needed, and the set is ready within 30 minutes. With 3 presets per camera, we choose from 15 different camera angles that guarantee dynamic footage.

What it delivers

- ▶ *With good preparation (around 6 questions per guest), an average of 8 vodcasts on a single event day.*
- ▶ *8 long-form video episodes for your own website or company video channel, with audio ready to publish directly on Spotify, Apple Podcasts, and similar platforms.*
- ▶ *Using AI, another 4 to 5 short-form video snippets per episode, ready to use on social media, at least 20 in total.*
- ▶ *Maximum visibility, plus a solid contribution to your organization's thought leadership and authority.*

Practical

- ▶ *Ideaal aan tafel: 3 tot 4 gasten plus een moderator of gastheer.*
- ▶ *Dit kan in een aparte ruimte, maar een rustige hoek van de eventlocatie is ook mogelijk. Een locatiecheck vooraf vinden wij daarom belangrijk.*

Investment

€ 3.250*

- * *Includes the necessary equipment, PPM (Pre-Production Meeting), post-production, addition of branded elements, subtitling of videos with AI, one revision round, and an online viewer. Excluding travel hours, travel and transportation costs, and VAT.*

Capture Only

€ 2.275*

Do you have your own marketer or freelance editor who prefers to edit it themselves? Then we'll take care of the setup and switching (live or ISO), and deliver both the switched version and all separate ISO camera feeds.

- * ** Includes the necessary equipment. Excluding post-production (editing, branded elements, subtitling, etc.), travel hours, travel and transportation costs, and VAT.*
